

## Relieved Wrist and Arm Pain\*

The Evoluent™ VerticalMouse 3™ is the third generation of the revolutionary mouse from the inventor of the handshake grip. Many users said earlier generations of the Evoluent VerticalMouse relieved their wrist and arm pain\*.

- **Eliminates forearm twisting**  
 The patented shape supports your hand in a fully upright handshake position that eliminates forearm twisting. Many users said earlier generations of the Evoluent VerticalMouse relieved their hand, wrist, or arm pain. See the Evoluent web site for user comments.
- **Familiar grip**  
 The grip is the same as an ordinary mouse's, just turned sideways. Many users said they got used to it very quickly.
- **Easy to use buttons**  
 All 5 buttons are easily operable without contorting your fingers.
- **Fits different size hands**  
 The shape has been improved to fit larger hands as well as smaller hands.
- **Prevents desk rubbing**  
 A small lip on the bottom edge prevents the little finger from rubbing the desk.
- **Ultra fast response**  
 A 2200 dpi true optical resolution sensor moves the pointer more quickly to reduce hand movements.
- **Highly programmable**  
 5 buttons are each programmable with different functions in different applications, for example, a button can be Double Click in one application and Ctrl in another application. The software also includes special features such as:  
*Speed toggle* - cycle among up to 3 pointer speed settings with a keyboard shortcut or mouse button.  
*Auto click* - automatically click by pausing the pointer.

All 5 buttons are easily operable without contorting your fingers.
